Antivirus Free Dr FileShredder! is a file cleaner, eraser, shredder and data privacy protector. It is in the same class as the very popular programs such as Recuva, KPROF, WinThief and many others. But this program is free. You can use it to securely remove files from the computer, or just free disk space. Besides files you can shred empty sub-directories, delete temporary files, change or restore the system registry, erase the recycle bin (in case it is not deleted) and a lot of other wonderful actions. You can also run two or more of these programs simultaneously (they don't interact with each other, they just run in parallel). This program is very easy to use - just select the task and press "Start". The output window with a list of the currently running actions will pop up. There's nothing to learn - just select the items you want to delete, move them to the "empty" folder and click the "Clean" button. No backups, no registry changes, no system files, nothing. This is the best and fastest data eraser available on the market. It is possible to create a list of files or folders to be deleted. You can also "clone" items to other locations.
