Picture stitches, combine & compare. Using the webcam or smartphone snaps, a picture from one device instantly disappears, and on another device is replaces with the same picture. For example, if I took a picture on my phone, and then on the laptop or PC, they can be combined into one. Existing connection will be saved if you start from the same device and are signed in to the same account. The stitching quality is perfect, there is no blurriness or unevenness. Overlay of the picture: Showing the overlay of the picture: Picture is zoomed in: Setting the picture to a zoom, when the device is out of sight, I'm able to record the picture, then when I move it to view, I can zoom in, using the existing position as a reference. View the result instantly: There are lots of features: * Full screen: (1) can be enabled or disabled, (2) changes the resolution of the destination picture to full screen. * Cropping: Crop function is enabled when the cropping is enabled. For example, if the original picture is taken from the phone, it would not be possible to set the width or height of the picture you took from the screen. Crop function is also used when you want to fix the area of the image you are taking. * Home automation: This application can trigger the home automation system to wake up the computer to take a picture. * Splitting: Enabling the splitting function will automatically split the picture you took into two separate pictures. * Convenience: You can use the picture in this application in the same way as you use any image, for example, wallpaper, or set it as the desktop picture. * Android & iOS Support: * For Android: How to install: To install, download the Android app from the Google Play Store: - Open the Google Play Store - Search for the app "Screenshot Join" - Locate and install the app - Open the app, sign in - You can add multiple screenshots - You can create multiple projects For iOS: How to install: To install, download the iOS app from the App Store:

Screenshot Join   Screenshot Join   Description   Screenshot Join   The reason why we are stating that this application is a simplified version of the full-featured program is that it is easy to use and has the same functionality as its more advanced counterpart, but it lacks some extra features.   Screenshot Join   You can use the software to stitch multiple screenshots together into a single image.   You can stitch them horizontally or vertically, but you should keep in mind that the former requires your screenshots to have matching widths, while the latter requires matching heights.   Screenshot Join   In the main window, there is a button for adding screenshots, a button for using the webcam, one for saving the result and two buttons for triggering additional actions, such as viewing recent projects or changing the resolution.   Screenshot Join   Although it is not entirely possible to view all the screenshots at the same time, but the application lets you browse the list and select the ones you want to use for stitching, and the rest of them will be deleted automatically.   Screenshot Join   You can not only combine multiple screenshots into one single image
