"The president has no choice," White House spokesman Hogan Gidley told reporters at the White House. "He does not like this bill and we believe that it's an abuse of power." Republican and Democratic lawmakers who support the legislation say Trump is endangering the independence of the judiciary and undermining the rule of law by shielding Mueller from dismissal. But the White House and Republicans said the measure could lead to impeachment of the president. "I think it's very clear that they are attempting to undermine and to actually remove a duly elected president from office," White House Press Secretary Sarah Sanders told reporters at the White House. In a signing statement on Wednesday, Trump said he was vetoing the legislation because "it is unconstitutional, unnecessary, and would harm the ability of the executive branch to respond to threats to our national security." The veto is a major loss for Democrats and some Republicans who have called for legislation to protect Mueller as the investigation into possible collusion between Trump's campaign and Moscow in the 2016 election continues. Mueller, who took over the investigation in May, has come under scrutiny for a federal indictment in the first case brought by his team of Trump's former campaign chairman Paul Manafort on charges of money laundering and failing to register as a foreign agent. Mueller also has charged Trump's former campaign adviser Roger Stone and former national security adviser Michael Flynn, a Trump campaign official. FILE PHOTO:
