PowerPoint To Pdf Converter 3000

PowerPoint to Pdf Converter 3000 is a simple application that allows you to convert PPT and PPTX files to PDF, as long as Microsoft PowerPoint is installed on your computer. It offers support for batch processing and can encrypt the created documents. However, while the program includes several conversion profiles, they are not well-designed. Additionally, many of the features that are displayed, but grayed-out in the application's interface have nothing to do with its intended functionality. Convert multiple files in one operation The program's main strength lies in its support for batch processing. You can load any number of PPT and PPTX presentations and convert all of them at once. It is even possible to use drag and drop actions or have the application import all the supported files in a particular directory. Modify processing settings PowerPoint to Pdf Converter 3000 features built-in conversion profiles, each best suited for particular types of source content. You can choose between a default, text or image mode. However, while you can also modify page size and margins, encrypt the created documents and insert watermarks, many of these functions are only available when selecting a certain PDF output mode. Outdated and badly-designed interface While the program's interface is rather out-of-date, it does perform its intended functions and is relatively easy-to-use. However, many additional features are displayed but unavailable. These are not related in any way to PowerPoint conversion and have no reason to be included. Overall, PowerPoint to Pdf Converter 3000 is a straightforward application that can be used to convert Microsoft PowerPoint presentations to the PDF file format. It supports batch processing and can encrypt documents, but is drawn back by its unimpressive interface and conversion profiles. Key Features PowerPoint to Pdf Converter 3000 Overview This program is designed to allow you to convert PPT and PPTX files to PDF. The process is performed via batch conversion, which allows you to import multiple PowerPoint presentations into the application in a single operation. In addition to the basic batch conversion functionality, you can use drag and drop actions to transfer files to the application. The PPT files that you want to convert are then listed in the program. This is followed by a conversion process that can be performed in different modes, such as image, text or all the options. If you do not wish to use a particular PPT or PPTX format, then you can select a particular option

PowerPoint To Pdf Converter 3000 Full Product Key [Mac/Win]

Create a dynamic X Macro that runs a command based on the parameters that have been entered.
