What's New in the MapQuest?

This MapQuest Widget for your web site can be used for easy navigation or a map to create your own navigation. This easy to use module lets you show a map on your site or view the map through the MapQuest Widget. 1. The MapQuest Widget will show the map as found in MapQuest.com. The map is the default size. 2. The MapQuest Widget has a selectable map size (by dragging with mouse). Also you can set the location in the map. 3. The MapQuest Widget can also show some default labels on the map (as in the MapQuest.com example). Every map is an image, so it's very easy to integrate into your site. Simply drag and drop the code where you want it. The documentation for the widget can be found in the MapQuest Documentation Center. The source files for the MapQuest widget are included in the zip package. The MapQuest Widget comes with a special demo server, which is shown in the Widget Builder interface. Need help with the Widget Builder interface? You can simply contact the MapQuest developers and they will help you setup your MapQuest Widget. MapQuest Licensing: The MapQuest Widget is free for use with your own web site. MapQuest does not guarantee the accuracy of the map. All risks associated with using the MapQuest Widget are assumed by the user. Use of the MapQuest Widget is subject to the terms and conditions of MapQuest. Add this MapQuest Widget to your site to instantly get maps and routes from one convenient module. Get the MapQuest widget and test it to see what it can actually do for you! Requirements: [Yahoo! Widget Engine](#) MapQuest Description: This MapQuest Widget for your web site can be used for easy navigation or a map to create your own navigation. This easy to use module lets you show a map on your site or view the map through the MapQuest Widget. 1. The MapQuest Widget will show the map as found in MapQuest.com. The map is the default size. 2. The MapQuest Widget has a selectable map size (by dragging with mouse). Also you can set the location in the map. 3.
