AmiChart

===== AmiChart is easy to use - and very easy to customize. It's the charting component of the Free Graphics Template Designer. In just a few minutes, you can have professional looking line, column, radar, pie, and doughnut charts on your computer. An associated graphics program makes it as easy as possible to create and save your own graphical templates. Please see the link to the award page for details on this Free Download. Thank you for your support and interest. Please Note that AmiChart does NOT have any graphic adware. How to get the Free version of AmiChart

===== Click below to go to the download page for AmiChart. You will be given the download link. Important: If you do not have the download link, please click on the link below. Please Note that once you complete the download of the Free Version, you are no longer able to get the latest version. Extended capabilities

===== AmiChart is not just a charting component - it's also a graphics program. AmiChart can be used to create custom graphical templates (in formats such as.tif,.eps,.pcx) with your own data. It can be used as a standalone application or integrated into an AutoCAD or other CAD system. AmiChart can create pie charts, doughnut charts, line charts, bar graphs, scatter plots and radar charts. You can also draw shapes, logos and icons. You can place any of these objects on a background, including a photo. When you save your graphic in.eps,.pcx or.tif format, you can open it in any graphics program - Adobe Illustrator, CorelDraw, CorelPaint, GIMP or Paintshop Pro. You can further customize the appearance of your chart by modifying the colors, text, fonts, etc. AmiChart provides extensive editing capabilities and can export your chart in a.png or.eps format. It also allows you to annotate the chart and to add a background if needed. Software Requirements

===== Before you can use AmiChart, you will need these items: Windows operating system - you can use any version of the Windows operating system, from 95 or 98 to Windows Vista. Sample Dataset (multipage)

===== Use the provided sample dataset

What's New in the?
