This is a multi purpose program that adds graphical control to the Parameter List System panel of WMP11. It also adds a New file option to WMP11 under Media Tab. This video shows the basic set up of the program: Note! There are alternative programs of Parameter

---

List System that add functionality to WMP11. In comparison, Parameter List System has a full featured GUI for a no-frills setting panel that you can use to control your WMP11 Parameters. Additional Features of Parameter List System: - It supports multiple physical drives, allowing you to use many computers at once - You can configure an array of drives that will be seen as a single unit - On Windows Vista/Windows 7, Parameter List System can auto-extend an array of drives so that if you increase the amount of drives you use, the system automatically resizes - Parameter List System can view and edit multiple folders at once - Supports remote folders, useful if you have to access your music - You can put Parameter List System on your taskbar, where you can instantly access it - You can add a List view for your MP3 music libraries, that allows you to access the selected mp3s that are stored in any sub-folders of your music libraries - You can type any path into Parameter List System, and it will automatically search the given folders - Windows XP/Vista/7/8 - Multiple folders can be seen at once - You can see and edit the value of any folders, with out having to open each folder - You can create your own folders with custom names - You can name each folder with an icon to make it easy to recognise - You can set Parameter List System to be automatically displayed in the system tray, or you can disable this - You can run Parameter List System in the system tray, or you can disable this - You can set a shortcut to go directly 09e8f5149f

This software installs various applications from download sites into your computer. It saves all the programs you want to install onto your hard disk so you can find them with just a few clicks. All you have to do is choose the program you want to install, and GetIt will automatically download and install it for you. You can define where you want the program to be installed (EXE or DLL) and the program name. GetIt can also update your program if you already have a version running. From the home page you can choose a program to install, view the description, change the update frequency, and specify the program name (ex: Win 2000) Other programs can also be installed with this software, just add them to the list of programs you want installed. Many users prefer to use an application that is already on their computer rather than going to a particular website and downloading it. This program is designed to make it possible to do just that. With IT Grabber you can add programs from the installation CD to your computer. It's a single click program that's easy to use. After adding the programs you have it will give you the ability to search through the database and add more programs to your computer. You'll also have the ability to add or modify an already installed programs or to uninstall a program. And what really sets IT Grabber Apart from other similar apps is that the data is stored in a database which makes the application very quick to search for and get you the programs you want. You'll also be able to track your software usage through a built in usage tracker that's displayed on the home page of the program. You
