from the pantheon of gods and heroes. Download Ebook Microscopia Electronica (Section of Works in Science and Technology) PDF . Download Solution Two To Brief Exercise A Bakersfield College Mr. And. The Bible is a collection of ancient Jewish and Christian books considered sacred by Jews and Christians. Semidioses Y Mon 1cdb36666d

. was made in dd by. Semidioses Y Monstruos Pdf DownloadThe present invention relates to a heat-sensitive recording material. Recently, various printers have been proposed as an output device for computers and these printers may be classified into a wire dot type, a thermal type, a laser beam type, a light emitting diode type, a platemaking type, and the like. Of these, a sublimation thermal transfer recording material or a heat-sensitive transfer recording material is most popularly used, and these systems are described, for example, in U.S. Pat. No. 3,689,270, West German Patent No. 2,124,891, Japanese Patent Laid-Open No. 175744/1983, and Japanese Patent Laid-Open No. 133547/1985. In these heat-sensitive transfer recording materials, an ink is transferred to a heat-sensitive transfer sheet by a thermal head in which a heat generating element comprising a heat-generating resistance layer is provided on a substrate, and a printing operation is conducted by selectively activating this heat generating element according to information to be recorded, thus forming images. On the other hand, in the field of heat-sensitive recording materials, various improvements have been proposed so as to enhance the various recording properties, such as sensitivity, sharpness, etc. A heat-sensitive recording material which comprises a substrate, a dye-

---

containing layer formed on one surface of the substrate, a back surface layer, formed on the other surface of the substrate, and a protective layer on the back surface layer, is disclosed in, for example, Japanese Patent Laid-Open Nos. 12194/1981 and 12076/1980. Furthermore, an improvement of sensitivity of a heat-sensitive recording material comprising a substrate, a dye-containing layer formed on one surface of the substrate, a back surface layer formed on the other surface of the substrate, and a protective layer on the back surface layer, which is disclosed in Japanese Patent Laid-Open No. 12195/1981 is, for example, the provision of a mordanting layer on the back surface layer. This mordanting layer comprises a mordanting agent for the dye, and a compound containing a particular imino compound as a mordanting agent is particularly preferred, because it is highly sensitive to heat (see Japanese Patent Laid-Open No. 12195/1981). As a result of various studies conducted by the present
