Although the program may be used free of charge, no warranty of any kind is given with regard to the program. Use of this program is at the user's risk. ----- TABLE OF CONTENTS Version 1.0.2 V1.1: Removed related functions after locking it and no longer being used. Also, changed the mstool.s to work with the P1X cartridge. V1.2: Added a RUSSD.DAT and a RUSSD.BIN. Added a function to make a backup of the RUSSD.DAT and RUSSD.BIN files. Also added a function to make a backup of the VERSION.STRING file to D:/memory. V1.3: Changed the video commands to support the new post code.

Changed the name of the RUSSD.DAT and RUSSD.BIN to RUSSD.DAT and RUSSD.BIN. Added the mstool.s to test P1X code. Renamed mstool.s and mstool.s.bin to mstool.s and mstool.s.bin. Changed the default postcode from V1.0.2 to V1.0.1. V1.4: Changed the P1X code to work with the P4 code. Now is no longer necessary to delete the RUSSD.DAT or

RUSSD.BIN files after locking or unlocking the cartridge. V1.5: Added an uninstall function and some more functions and test functions. V1.6: Change the UNLOCK command to necessary. Added a command to boot the software in the P1X cartridge. V1.7: Added a command to reboot the computer. V1.8: Changed the format of the load.txt to try to keep a better record. Added a function to test the cartridge P1X on P1X code and added a function to test the P1X code for P4 code. Changed the UNLOCK commands to 648931e174

How to use the tool Information You can set configuration settings in the settings section. You can select a specific mode to adjust (Motorola Dialer for Quicklaunch, autodial, etc.). You can also set the screen section where you can change the configuration settings, for example, a combination of W10/W11 or other similar conditions (make the area bigger, smaller, change the font, etc.) If the screen is locked, the settings reset on reboot but the screen settings can be changed in the settings section. Note: Changes are not always immediately displayed on the screen section. If it is the case, you can select the show section and change the display to the section. If it is not the case, just wait a few minutes and the changes are displayed. How to access motorola code: Remote Window connections Because of the auto connecting feature in remote control, the process of remote window connection is different than a direct connection on the device. It is important that the phone is connected to the Internet. Open the Settings>Device Management>Web Browser. On the phone, connect to the local page "motorola.com". (It is the same page you use to connect to the browser in the device manager.) Once connected, you can connect or disconnect to the remote control. The remote control page will be displayed after the connection. On the remote control, you can see the information of the device connected to remote control, and connect to and disconnect from the device through the local page. You can also use the remote control to set settings in the local page. If you need to connect to a remote device through the remote control, you can change the settings of the local page. (For example, through settings to disable the auto connect feature, or to set a specific remote device to connect to.) Remote Window connection via dns Connect to the device remotely on your pc browser or software. If there are changes in the device settings, you will need to connect to the remote control. If you have problems during the process, make sure the remote window connection is set. It is also possible to change the local page settings and select the local page to connect to the remote control. On the remote control, you can set settings to manually connect and disconnect. You can also connect from the local page,
