Methyl hydrate is one of the most useful intermediate products industrially produced through hydration and de-hydration reactions between methanol and hydrogen. Since methyl hydrate is light and has excellent stability, this is widely used as an octane base material in engine fuels or gasolines or as a solvent for chemicals such as methylamine or ethylenediamine. In recent years, methyl hydrate which is produced by a methylation reaction between methanol and hydrogen is regarded as a possible candidate for future fuel for automobiles. Methyl hydrogen sulfate, a species of methyl hydrate, is one of the commercially important materials, and currently known methods for producing methyl hydrogen sulfate include: (1) a sulfuric acid method in which methanol is reacted with sulfuric acid to obtain methyl hydrogen sulfate and then dehydrated by heating, and (2) a cobalt catalyst method in which a solution of a cobalt salt in water is used as a catalyst to obtain methyl hydrogen sulfate by hydrogenating methanol (see Non Patent Document 1). One of the aspects in the industrial use of methyl hydrogen sulfate is the safety, and safety related therewith can be judged from the amount of sulfate ions contained in methyl hydrogen sulfate. As a method for judging such sulfate ions contained in a solution, a determination method using conductometry is known. Pure and Cured: Forgivable, yet unbearable Pure and Cured: Forgivable, yet unbearable By Barbara Shell The eight-month reign of Carlos Beltran has ended. The \$25 million-plus, six-year deal he signed a year ago with the Rangers has been called. It's done. And, as if in an afterthought, Beltran's final season in the American League will be spent with the Astros. Now that the righty-swinging outfielder will be bound for the National League, both at the player level and on the field, there's no escaping the realization that the stretch run for Beltran – his season, really – now belongs to the Astros. "I've never been in a clubhouse before," Beltran said with a shrug before the Astros took on the Rangers on Wednesday. "I'm trying to get ready." Yes, he's trying to get ready for the Astros. They did that for him. Beltran will be

## What's New In?

This post has been re-ordered. Secret Santa. It's a wonderful tradition, and I'm incredibly excited to participate this year. I can't wait to get to know the people who will be participating in this year's Secret Santa exchange, and I want to say thanks to some of the previous exchanges I have participated in. So, without further ado, here are the gifts that my Secret Santa has sent me. Kindle Voyage My Secret Santa has really gone above and beyond. He's got me an entire Kindle Voyage for the holidays (I did ask for that one, but I didn't ask for a Kindle Voyage.) He's got me a really nice case for it, along with a Bluetooth mouse. The gifts are great, and they're going to be a huge help when I travel with my Kindle Voyage this month. Mixed Greens & Strawberries My Secret Santa has also sent me a really lovely mix of Mixed Greens and Strawberries. It's really tasty, and I love the color combination. This will definitely be getting enjoyed during the month of December. Journal I have no idea what the purpose of this journal is, but I love it. It's super whimsical and decorated, and I'm fascinated by how the fibers and papers have been worked into the design. I'll have to ask him why he got me this journal, but I'm assuming the answer is going to be along the lines of humor. Everything's Gonna Be Alright The most hilarious gift I have ever received in the history of the world. My Secret Santa really took an entire deck of playing cards and turned it into a book. Included in the book were 72 cards, with two sides, alternating between normal and black and white, and the card backs have been transformed into a book design. It's absolutely ridiculous. If you're looking for a surprise or an easy gift exchange, I highly recommend you look into the Secret Santa exchange with your organization. I know it can be intimidating, but it's a wonderful way to interact with the people around you. In a series of major upgrades to its mining portfolio, Binance has added the Stratis blockchain network to its exchange. All users will be able to trade CRW tokens for USDT and CR
