totally over-designed to satisfy the requirements of the US department of space and aeronautics, the future program plan for the Hubble telescope leads to the alarming conclusion that we have now overstretched the Hubble and that it has not been improved enough in size, power, avionics, storage capability or actuators to be used in the way that a reasonable analysis was to be expected. The Hubble was at its maximum scientific output in 1997, that is it was delivering 18 to 20 times the scientific output of any other telescope. The increase in scientific output was due to the arrival of the ACS camera, a technologically complex and expensive system of over a dozen instruments. The information gathered by the ACS is the primary reason for the Hubble's upgrade to the WFPC2 camera from the WF/PC. The problem with the Hubble is the DOE fiscal policies of the late 1990s, making the Hubble's original huge cost virtually unsupportable. The report, The Future of the Hubble Space Telescope, can be found in the Proceedings of the National Academy of Sciences, Vol. 102, No. 11 June 19, 2005 and can be downloaded from

Held at Hart Plaza, the city's main civic park, the fest was so intimate it felt like a private party. At times, even the outdoor area felt like an indoor festival. At first, I didn't understand why, but then I realized what they were doing was eliminating unnecessary variables in order to achieve the perfect balance of crowd size and space. For instance, this year's headlining performances were all held indoors, so the sound was more of a priority than ever before. I can't say for sure, but I would guess the huge outdoor crowds of previous years weren't really able to hear the music for the most part, and smaller crowds definitely wouldn't have experienced the same level of intimacy. It was encouraging to me that the festival organizers decided to make the change. Of course, this change didn't allow the festival to be as big as past years, so the quality of

---

the lineups varied widely. The new type of format also helped the fest attract younger crowds, who weren't as likely to attend EDM festivals of previous years. Detroit seems to be on a positive upswing, and the electronic music community has a great place to put on a festival. One of the highlights of this year's fest for me was watching Baltimore's Splashdown and Detroit's Metro Detroit Showcase battle it out in head-to-head battle. It was the first year the two celebrated our city's name on stage. This year, the people of Detroit took over something for the first time. The American city of Detroit has a long and storied history that most
