The Arsenal

In My Career mode, that journey means taking charge of the Arsenal Football Club in England. Intensifying a previous relationship with EA, during which our studio began work on FIFA 17 (and Source engine's debut FIFA title), our focus will be to deliver, as I. G. Farben suggested to the original developer of the Barcelona IFB, on a football experience closer to that which we know fans love. We keep the game grounded in our realistic football engine, but we will bring new depth and unparalleled immersion to the world of football. The game will retain its tactical base, but we aim to introduce more depth in gameplay with the introduction of new features in the areas of movement, on-ball action, and more.

FIFA 22 brings a new level of heart, and real tension, to match making, and it reflects the timing of the real-world off the pitch as well as on. Touch controls and dynamic 3D Faces The new touch controls put the ball where you want to put it. Get to the top of your attacking third, hold down the left stick to pass the ball, release to shoot and more. FIFA 22 introduces a refined touch control system to make passing the ball a more natural experience. You can flick your right stick to either throw the ball into space or head it into the net. You can also flick to shoot with one touch or add more control with second touch if your shot just doesn't want to come off. Dynamic 3D Faces give you a 360-degree view of your opponent. Never miss a shot. Watch your opponent intently as they approach and retreat, and use the dynamic 3D Faces to see the look of anticipation or surprise on their faces as you prepare to take aim. Re-Created SPORT Shield Playing Field Top down views and direct player controls are gone, and with FIFA 22 you see the game from ground level. Players can run freely with players switching direction based on where they move, making the game more realistic and action packed.
