To navigate the Photoshop menus and tools, you can use either the keyboard or the mouse; to support your effort, however, you need to know how to make the basic selections such as drawing simple rectangles and circles. In this chapter, you discover the various ways in which you can use the tools in Photoshop to create works of art—and some of the secrets and shortcuts to make your work even easier. ## Finding Your Way Around Photoshop Photoshop is organized in layers, as shown in Figure 4-1. All the tools you use to create and manipulate images are on the toolbars. FIGURE 4-1: Tools are located on the toolbars, which you can move around by clicking the Resize tool. In Photoshop, you can use any or all of the toolbars, but I recommend using the Basic, Tools, and Layers toolbars the most. To hide a tool bar or to place it in a position that is convenient for you, right-click any tool bar and choose one of the items from the shortcuts list on the shortcut menus: Select All, Hide, Lock, Delete, or Edit. (You also can double-click a tool bar to hide it.) If you don't want to see anything but the toolbars and menus, select Hide Menus from the View menu and then choose Customize from the shortcut menu to return to the Preferences dialog box, where you can choose to display or not display the menus that are automatically displayed by default. In the sample dialog box shown in Figure 4-2, you see a choice to toggle on the menus themselves or to hide all menus by default. To reset the image to default settings, choose Reset from the Menu. The dialog box that opens lists all the preferences and displays the Photoshop shortcut menu. You can hide the menus as explained in the preceding paragraph, if you don't want to see them. FIGURE 4-2: If you're not seeing your menus, you have too many windows on your screen.

Pharmacokinetic-pharmacodynamic modeling of the effect of nicotine on platelet aggregation. Nicotine (NIC) acts on multiple signaling pathways and results in platelet hyperaggregability, that is, platelet activation. However, the pharmacokinetic-pharmacodynamic (PK-PD) relationship between NIC and platelet aggregability is not clear. We previously reported the influence of CYP2A6 polymorphism on the effects of nicotine on platelet aggregation. Here, we investigated whether the CYP2A6 polymorphism affects the PK-PD relationship between NIC and platelet aggregation by using a PK-PD modeling analysis. In healthy volunteers, NIC (3 mg) plus or minus CYP2A6 inhibitor (mephenytoin 500 mg) were administered. Levels of NIC, active metabolites (nicotine-3-glucuronide, N3G and cotinine, COT) and formation of cyanmethemoglobin (CyMb) in plasma and saliva were measured, and ADP-induced platelet aggregation was measured before and after each administration. Using this data, a PK-PD model describing the PK-PD effect of NIC on platelet aggregation was developed. The PK-PD model consisted of a two-compartment model, an inhibitory effect of NIC on CYP2A6 activity ($I(NIC)$), and a saturable effect of NIC on platelet aggregation ($E(NIC)$). The model was fitted to the data using a nonlinear mixed-effects modeling approach (NON

Motorist sues for ticket because she thought "Speed" sign was gas station By Shannon L. Johnson News Herald Staff Reporter A Virginia woman was the victim of a law that some call "absurd" — and she wants to change it. Kanaka Snead got behind the wheel of her car at a shopping center last September and thought that the sign on the side of the road directing her to a nearby gas station was actually telling her to get to a speed limit. In the end, she went through eight hours of trouble for a misdemeanor ticket. Now, Snead is suing in federal court because Virginia's speed limits are set too high, in her opinion. "In the past, there's been a lower speed limit on I-85 in Virginia, but not necessarily for the entire length of the freeway," she said. "I just decided to speed it up a little bit because I felt like I was in a little bit of a hurry to get somewhere." Snead was pulled over by Virginia State Police troopers for going 60 mph in a 45-mph zone. She received a \$500 fine. And she didn't
