Please note that all apps are
case sensitive and ALL
Samsung GSM phones, no
matter if they use the Java or
Symbian operating systems
are supported. Samsung PC
Studio review by Price, Ease of
use 5 Samsung PC Studio is a
must-have app for the
Samsung GSM phone user who
would like to sync the

handheld device to their PC. The GUI has a “click-click” style that is unfamiliar, but it's the Android of many Android devices. It doesn't come with more than about 20 features (compared to something like Opera Mini that comes with hundreds of features), but those that it does include are all essential. Full synchronization between your PC and your Samsung GSM

phone No matter if you want to synchronize contacts, calendar items or emails, transfer files or back up your data and even create and send text messages, Samsung PC Studio is the official program to use. It supports synchronization with most email clients out there, including Microsoft Outlook, Outlook Express, Lotus Notes and Lotus Organizer, so it allows you to easily transfer

your contacts between mobile phone and computer. Manage Java and Symbian related apps Samsung PC Studio is also a great and handy tool if you intend to install Java or Symbian apps on your phone. Just drag and drop the file you wish to copy on your handset and you're ready to go. You can also rip audio CDs, create music files and copy music files directly on your mobile

phone within a few clicks.
Powerful but not too friendly
Unfortunately, the interface
lacks the ease-of-use by laying
icons in front of your eyes with
no descriptive text. That
expands the time span needed
to get familiar with the
application and

Samsung PC Studio With License Code

Get the new Samsung PC

Unleash your creative potential on your phone! With Samsung PC Studio, on your PC or laptop, you can choose a photo, record your voice, take a self-portrait, back up your data, create playlists and more! It's fast and easy to record audio with Samsung PC Studio. Simply connect your phone to the computer using

the available USB cable, or Infrared port on the phone, and Samsung PC Studio automatically detects the type of device and makes it even easier to use. You can also use the built-in microphone to record your voice and synchronize with your contacts, calendar, email and more. Now you can make playlists with your music and image photos. Sync more than

one device at a time with Samsung PC Studio. You can transfer contacts, calendar events, and messages, plus image and video files and music, between your phone and your PC with Samsung PC Studio's advanced synchronization feature. It doesn't matter if you are using a PC or laptop or a Mobile Phone as the interface is very user friendly and easy to use.

Don't have a pen? Try out the handy Photo Undo tool - just select a portion of a photo and you can delete or modify that part of the photo with its simple and easy to use interface. You can also record video and edit the media in this file. Don't have a hard drive? No problem. You can backup your data without your phone connected with the USB to Hard Drive Adapter. The

Data Backup and Sync feature is a great way to back up your photos, music, contacts and any other data that you want to keep. You can also create a Music Document to share with others, and copy your data from a new phone or device to the one you already have or vice versa. You can also convert audio/video files to MP3 format and enjoy your favorite songs in your phone!

Share files and photos with friends and family easily! Transferring files to friends and family is easier than ever. You can make a copy of your contacts and settings and even make a copy of your contacts when you switch phones. You can also share photos and music between your phone and your PC by easily dragging and dropping the files or folders you want to copy.

FreeUpPC - Delete files by name, extension or sizeSmart browser search, control and delete any file, software, folder or drive from Windows Explorer. Delete files which were accidentally downloaded from the Internet or any other place, or photos which were accidentally copied to your computer. Manage your hard

What's New in the Samsung PC Studio?

Samsung PC Studio makes it easy to manage your Samsung phone on your computer. Use it to transfer contacts, calendar events, and emails between your phone and PC. Sync calendar events with any calendar program such as Microsoft Outlook and Outlook Express. Or, put music on your phone from a music player and listen to your music on your computer. It supports all kinds

of media files including MP3, WMA, WAV, M4A, AAC, and OGG. Another great application for you to make a photo album using your phone. It can convert between JPEG, JPG, TIFF, GIF and PIC to any other supported formats such as BMP, PCX, PNG, or PSD. *The MP3 option is based on the user's phone's memory card. Please note that data stored on the memory card is not

backed up if this option is selected. *The MP3 option is based on the user's phone's memory card. Please note that data stored on the memory card is not backed up if this option is selected. ... A powerful alternative to a standalone app Sometimes it becomes frustrating to just have a folder full of files on your PC. For example, if you want to transfer media files

from your PC to your mobile phone, transferring a small folder containing some 200 files will take much longer than what it takes if you let your PC access the files directly. In this case, a files manager that lets you sort and view the files within the folder is a great solution. Vista MultiCalendar is a Windows-based PC files manager that lets you view multiple calendar

appointments or events within a single folder. Vista MultiCalendar supports all Windows file extensions such as .mht, .htm, .html, .xls, .msi, .mdb and .accdb. The software allows you to view the text contents of a file by copying it directly on your computer, in addition to copying entire folders. It also adds your calendar events and contacts to the selected file/folder. Besides, the

calendar events are displayed according to the start and end time of the selected appointment(s). The powerful functionality of this software offers a quick and efficient method to view calendar events in a file. Once you have your folder containing the calendar events on your PC, you can easily view the content on your mobile phone by just connecting it to your

computer via a USB cable. You can access your newly created calendar with the
